Overture-9200
Series

Ticket Printer

The Overture-9200 Ticket Printer allows validation coupons to be made quickly and easily. The Overture-9200 prints linear barcode validations on standard fan-fold ticket stock and can be located anywhere within your parking facilities/offices when connected to the Overture network.

A user with the proper password and privileges selects the coupon and quantity to be printed. The printed validation coupons are then added to the Overture Management System database for tracking. The store number is encoded in the barcode to provide a predetermined discount at the parking facility and the validated ticket is automatically processed by an Overture-4000 Series Exit Terminal, Overture-5000 Series Point-of-Sale Terminal or Overture-7000 Series Automatic Pay Station.

The ticket printer can also be used to create day passes for use in Overture entry and exit devices for ingress and egress of the parking facility.
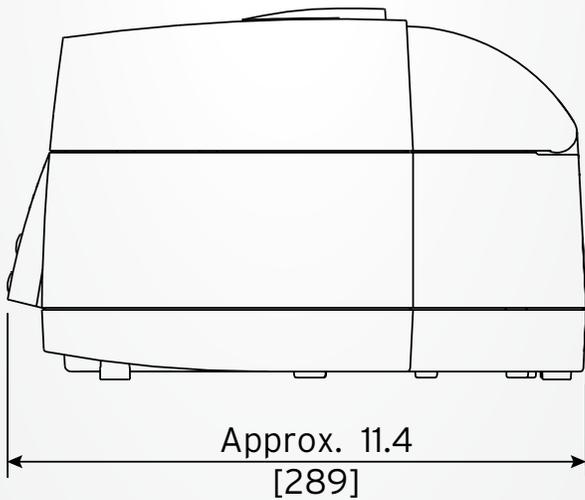

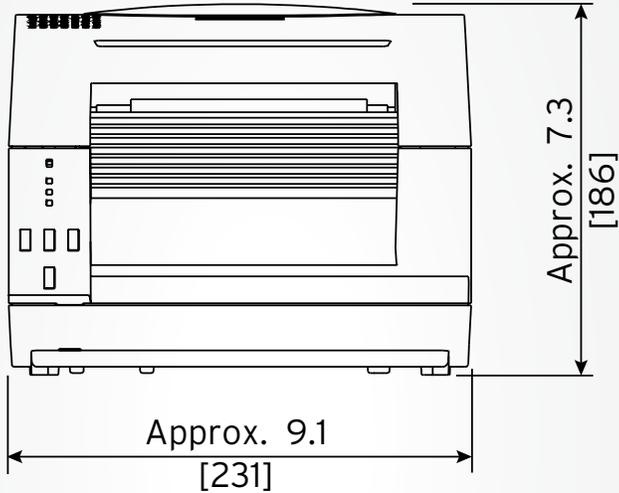

Features

- Machine-readable coupon automates validation transaction at fee computers, exit stations and pay stations
- Print barcode coupons on an as-needed basis
- Select coupon type and quantity per printing job
- Uses standard ticket stock
- Ability to print coupons is password protected
- Accommodates unlimited amount of unique validation codes
